PROJECT

Face Recognition and Emotional Detection System

<https://github.com/ElvishElvis/Real-time-Face-Detection-Recognition>

- Created local database and pre-store the features for each face for reducing the time consumption
- Extracted facial landmark with Dlib library and applied supervised learning on the facial landmark to predict facial emotion. Achieved highest validation accuracy of 89.43% with logistic regression.

EDA – Relationship between Students' Financial Data and College Completion Rate

<https://drive.google.com/file/d/1Q1oLpkj76I-jEtQwLPIWyUVLZgnJynZ1/view?usp=sharing>

- Cleaned the data and filling null values with samples from sample distribution
- Used linear regression to analyze the correlation between parameters

Data Visualization – Suicide Rate

<https://yuc399.github.io/dsc106-final-project/>

- Analyzing the highest suicide rate among different age group between 2005 to 2015
- Perform results by visualizations using HighCharts, JavaScript, HTML/CSS and Python.
